## Edge Profiles

Your surface is not complete without an edge profile to complement your slab selection and space.

With keros stone, selecting the best fit is easy.

The unique properties and durability of keros stone quartz surfaces allow for a wide range of edge profile design options.

Many edge profiles are possible, from a standard edge to laminated or mitered edges which create the appearance of a thicker slab.

All edge details should have a minimum 1/8" radius on any profile, for both top and bottom edges.

For high-traffic areas, 1/4" minimum radius is suggested.
